SECTION 3: PYTHON OBJECT AND DATA STRUCTURE BASICS, 2 hrs 2 mins, 33 parts

- **31/36 Quiz 6: Sets and Booleans Quiz**
    - a set is a list where none of the numbers are duplicated
    - .append() <- this is to add elements to lists
    - .add() <- this is to add elements to a set (you're not adding it / appending it onto the end of anything etc)
    - set([1,1,2,3]) returns {1,2,3} <- it's like in maths (standard / group notation, sets are denoted by {})
