SECTION 3: PYTHON OBJECT AND DATA STRUCTURE BASICS, 2 hrs 2 mins, 33 parts
- **21/36 Quiz 3: Lists Quiz**
  - lst=[0,1,2] what is the result of lst.pop()
    - ‣ -> this returns 2 because pop pops off the last element of the list
    - ‣ -> you can have multiple object types
  - If lst=['a','b','c'] What is the result of lst[1:]?
    - ‣ -> from the first element b to the last c -> b and c
    - ‣ -> zero indexed language
