SECTION 3: PYTHON OBJECT AND DATA STRUCTURE BASICS, 2 hrs 2 mins, 33 parts
- **19/36 Coding Exercise 6: Lists**
    - ○ we have a list, [1, 'two', 3.14159]
    - ○ the idea is - you can have multiple different datatypes in the same list
        - ‣ -> an integer
        - ‣ -> a string
        - ‣ -> a float
